

To the business partners of the BAUMANN Group

Date: **10 September 2020**

Update to operations at BAUMANN during the global Corona pandemic

Dear business partner,

The impact of the Corona Pandemic on the global economy has been a major challenge in the recent months. Although the number of new infections is currently on the rise again in many European countries, we are observing a stabilization of the order situation and clear signs of an incipient economic recovery. Our global task force team continues to monitor the situation and coordinates all measures in order to protect the health of our employees and ensure the continued operation of our plants.

Current situation

All BAUMANN plants have resumed normal operations and there are currently no shortages in our supply chain. Should operational restrictions arise due to the ongoing pandemic situation, the affected business partners will be informed immediately by our plants.

At all the BAUMANN plants, strict hygiene measures are in place, in line with the requirements of the local authorities. There are regular observation tours to ensure the implementation and effectiveness of the defined measures. Please understand that direct personal contact with external persons such as customers, suppliers and service providers as well as our travel activities may be restricted in order to protect our employees and our production in the best possible way.

Cooperation with business partners

BAUMANN would like to thank all its business partners for their cooperative and constructive collaboration during this extraordinary crisis. To ensure an optimal adjustment of capacities and coordination in the supply chain we continue to ask our customers to inform us of any adjustments in the planning of their call-offs as early as possible so that we can guarantee the necessary capacities at our company and our supply chain. Our customer service is available for questions.

We look forward to a further cooperative collaboration with you.

Kind regards

Thomas H. Rüegg
CEO BAUMANN Group
