

QUALITY, ENVIRONMENT, HEALTH AND SAFETY POLICY

Quality, safety, environmental and health protection, are integral elements of our company and key for our success.

Zero defects

We understand quality as meeting our customer requirements and other compliance obligations for our products and services. We aim to achieve zero defects.

Zero compromises

We ensure safety at work, promote the health of our employees and involve them actively in supporting this policy. We reduce the impact of our corporate activities on the environment through comprehensive measures and a responsible approach to the use of natural resources.

Continuous improvement

We make continuous improvements in all areas. We routinely verify the effectiveness and efficiency of our system, processes and implement our objectives sustainably.
